

We, Digital Pulz (Pvt) Ltd., are pleased to announce the addition of "Tele Pulz" & "Pet Pulz" mobile applications to enhance the features of the Vet Pulz product.

"Tele Pulz" is a simple smartphone application that allows for video consultations. Your clients can pay online and get your consultations without visiting your clinic, maintaining social distance. This is ideal for post surgery follow ups. It helps you to observe the pet and its behaviour in its natural environment. You have full control to start and end the session and continue video conversation while recording examinations and prescribing medications.

"Pet Pulz" allows pet owners to simply keep vaccination records and information about previous visits to your clinic. This is to help you and your client to avoid the problem of frequently misplacing and forgetting pets' clinical record books. This is updated even if they get online consultations or online post surgery follow ups.

With the development of the epidemic and the need to limit social interaction, our mobile application will assist you in continuing to operate your clinic while complying to health requirements and protecting your clients.

The procedure of video consultation and pet registration is within your control, and your earnings are kept private

WE OFFER THE BEST TECHNOLOGY APPLICATIONS TO MAKE YOUR WORK CONVENIENT, EFFICIENT AND PRODUCTIVE..!

"TRANSFORM YOUR VETERINARY CLINIC TO SMART CLINIC WHILE MEETING THE CHALLENGES POSED BY THE NEW NORMAL."

We appreciate the service you bring to our community by servicing clients and their pets of various breeds and walks of life. We understand how stressful it may be to deal with pet/client administration, record keeping, pet history tracking, and management. Furthermore, this pandemic has introduced new problems, such as movement limits in areas where they are unable to reach you.

We, Digital Pulz (Pvt) Ltd., developed a software solution, 'Vet Pulz,' to protect your vet clinic and hospital from the aforementioned threats and deliver you peace of mind. This software is the product of extensive research into all aspects of clinical flows in your veterinary practice. It features simple interfaces and a straightforward approach. It protects the privacy of pet/client records while securely storing them in accordance with the most recent standards.

Vet Pulz comprises six modules that collaborate to complete the clinic's workflow in an efficient and effective manner.

Front Desk	<ul style="list-style-type: none"> • Initial registration of pets. • Making appointments/online appointments • Issue tickets to maintain queue • Assignment of pets to diagnostics rooms • Attaching lab reports and X-rays to pet's profile
OPD/Inward/Boarding	<ul style="list-style-type: none"> • Maintain pet's Electronic Medical Record (EMR) • Prescribing medicines, Lab and Radiology Requests • Record Examinations, Vaccinations, and Dressing room operations • Online video consultations • Adding consultations and medications to the bill • Manage meal/cage plans during inward/boarding period
Pet Store/Pharmacy	<ul style="list-style-type: none"> • Billing for medications and Pet Store items • Allowing for refunds, credit payments, and advance payments
Inventory	<ul style="list-style-type: none"> • Convenient Inventory management and pricing • Integration of pharmacist and cashier in pre scripton issuance • Stock updates in real time • Reminders on date of expire
Laboratory	<ul style="list-style-type: none"> • Add/update laboratory tests • Customizable reporting • Generation of bills
PACS	<ul style="list-style-type: none"> • Web-based image (DICOM) viewer • Internal & External physician radiology requests

On your request we can integrate SMS and internet payment gateway to enable your clinic to send SMS messages and to receive online payments
